

TRANSFORMATION ENZYME CORPORATION

Testimonial: “Rome’s Biggest Loser”

Transformation provides the most effective supplements for digestive health in the world. At Pro Fit Nutrition we have had tremendous success helping people restore normal digestive function with the consistent usage of **PROBIOTIC**, **DIGEST** and **PROTEASE**. In conjunction with a healthy diet and Transformation Enzymes, amazing things can happen. We have also had amazing success reducing joint and muscle inflammation with the combination of **PROTEASE IFC** and **REPAIRZYME**. I currently use these products with the world-class sprinters that I coach. There is absolutely no substitution for these products!

When we had our first meeting with the *Rome’s Biggest Loser* contestants I took a poll regarding digestive health. Out of 20 contestants:

- 11 had their gall bladders removed
- 6 complained of constipation (one had a complete blockage and had to drop out for medical reasons)
- 16 said they suffered from frequent gas, bloating and indigestion.

After two weeks almost every person was asymptomatic. There were very few complaints of indigestion, frequent bloating and gas. The combination of **PROTEASE**, **DIGEST** and **PROBIOTIC** ensured that each contestant would be able to digest, assimilate and use the nutrients they were consuming. Without these products it would have been impossible for the contestants to lose such a large amount of weight in just six weeks.

One participant made the following comment: “I was lucky enough to be chosen as one of the participants in the program. Whether or not I am the ultimate winner of the competition, I have already won by losing over 15 pounds in six weeks. I have used many supplements over the years, but not often for weight loss. Your efforts to ensure digestive health are much appreciated! I was eating a lot of food, and I am sure that your products helped me digest it effectively. I will be sure to recommend your products to anyone seeking good digestive health.”
